SUMMARY

With a diverse skill set spanning graphic design, UI/UX design, and full-stack development, I am not just a designer or developer - I am a creative technologist, capable of conceptualizing ideas and bringing them to fruition with precision and innovation. My ability to seamlessly integrate design and technology makes them a valuable asset in any project, where I can transform visions into reality and elevate user experiences to new heights.

EDUCATION

Graphic Design, UI/UX, Full Stack Web Development
Image Creative Education(NSDC), Madurai
📅 02/2023 - 08/2024   ⊙ Madurai, Tamil nadu

PERSONAL PROJECTS

Cosmetic Brand Identity - Overlook

Developed a comprehensive brand identity for a new cosmetic line, including brand name, logo design, target audience analysis, messaging strategy, and packaging design.

Case Study - Plant Community App - Green Bond

Developed a plant care app that empowers users to cultivate healthy plants through automated reminders and fosters a supportive community for plant lovers

Case Study - Online Job Portal - Techy Tidal

Evaluating the user interface and user experience of a popular online job portal, identifying pain points for both job seekers and employers. Proposed and tested design improvements to enhance user engagement and streamline the job search process.

Full stack Development - E-commerce - Glam Gears

GlamGears is a dynamic online platform designed to connect tech enthusiasts and buyers with sellers of electronic gadgets and accessories. Our platform provides a user-friendly environment for browsing, buying, and selling a wide range of products, from smartphones and laptops to gaming consoles and cameras.
